Tip: Updated VA Top 10 Fortify Scan Issues Released

This week's Secure Coding Tip is about the release of an updated VA Top 10 Fortify Scan Issues For 2015 (Q2).[1] Scanning source code to perform code review is an authorization requirement included in the Technical / Testing Requirements of the OCS Accreditation Requirements Guide / SOP [2], and enforced as part of the ATO issuance process.[3]

The VA Top 10 Fortify Scan Issues lists do not contain any vulnerability information. These lists can be used to learn from others, to become aware of common pitfalls. And, to help System Owners, Project Managers, Information Security Officers (ISOs), and all system / project / contractor staff with furthering awareness of the risk that software creates in the agency.
